

Technical Subcommittee
August 24th, 11:30 am eastern

Attending:

Charlie – TX; Jan – EPA; Todd – OH; Mark – IN; Erin – IL; Lester – EPA; Joni – CO; Aneka – MN; Leslie and Chip – GA; Barb – KS; Audrey Z; Sara – NH; Rick – OH; Dan – IA; Linda – TN; Jim – NY; Paula – EPA; Sarah – TX/NCAP; Tony – NC; Renee – WI

Minutes:

1. Renee announced that Dan Nickey and Barb Johnson have volunteered to take over as Co-Chairs of the Subcommittee starting with the September call.
2. Make sure to get comments on the Foundry information sheets from EPA. Send to Gary Blais: blais.gary@epa.gov.
3. Prepared Feeds comment letter
 - we need to get and final comments from Tech and NSC by end of today so Annette can sign on Wednesday and submit to EPA
 - natural additives may still contain the regulated compounds – so finding alternatives may not completely eliminate the HAPs
 - suggest that shouldn't be a penalty to those with lower emissions because the compounds have a dietary benefit
 - Joni will send Renee additional comments
 - records, monitoring frequency, certification requirements
4. Chemical Preparations
 - have identified monitoring and reporting
 - why 1 year compliance date instead of usual 2 years
 - CEMS as alternate monitoring is unheard of for smaller sources
 - alternate mentioned in preamble – gr/dscf – is often used in states in permits; each to get manufacturers guarantee on exhaust concentration
 - WI, NY and CO use it – agree should include that recommendation
 - Joni has other comments and will send them
 - Renee needs the comments by Friday August 28, need to share draft with NSC at call on Sept. 1 and get letter to EPA by Sept. 4.
5. Other topics
 - Anyone experiencing requirement on small operations to report effluent data to eDMR (online reporting system)?
 - no one knew of anything
 - Anyone else have issues with RACT rules for Litho on 2006 CTG?
 - IL is drafting some – Erin will send
 - CO is drafting – using both 06 and newest CTG, and will apply case by case
 - wouldn't case by case cause regular SIP revisions?
 - 6H updates
 - Len Lazarus indicated anyone petitioning out must first submit initial notification
 - anyone know if need mechanical confirmation of airflow/pressure in booth?
 - don't believe so
 - NY working with jobbers to find HAP free coatings

- learned DfE video not out yet
- DuPont contact seemed against shops petitioning out
- Video update
 - Paul W in Region 5 is bringing some to stakeholder meeting in GA
 - Tony said EPA approval process held it up for months, but he got a copy yesterday
 - Paul W found air funding (105 funds from each R4 state) and will print 15,000 copies with \$25K.
 - Holly is limited in number of copies she can make right away, but has grant from Joan to print 10,000 copies for requests from the web
 - will be publicizing it at NACE? (big trade show in Las Vegas) – they will send open invitation to SBEAPs through Joan, can help pass out videos and talk about services in our programs
 - Sept 15-16 NC is providing training session, Len Lazarus on 6X and 6H – anyone invited, if they have funding
- ICAR training
 - DuPont saying that's not good enough
 - Tony plans to use with Community College training sessions in near future
 - as of Sept 1, fee will be just \$40 to take the training – and it includes a test that must be passed to get certification
