

SBEAP Technical Subcommittee
Conference Call – October 29th
2:30 pm Eastern

Attendance: Sharon Nizich – EPA, Jim Coyle – NY; Jackie Sims and Erin Conley – IL; Aneka Swanson and Kim Grosenheider – MN; Leslie Churilla – GA; James Robinson – SC; Rick Carleski – OH; Barb Johnson – KS; Todd Nein – OH; Tony Pendola – NC; Linda Sadler – TN; Mark Stoddard – IN; Joni Canterbury – CO; Lucy Thompson – MO; Renee Bashel – WI; Sarah Walls – TX (NCAP rep)

Minutes:

1. Regulatory Review and Reform nominations for 2008/9

- general agreement to pull from previous list
 - may need additional supporting info to get accepted
- add metal fabrication and plating rules – need specifics to change and supporting reasons
- NSPS for small boilers w/#2 fuel oil and natural gas
 - drive permits in many states, with little benefit – no emissions limits
 - fuel monitoring – can be daily unless use ULS fuel oil
 - some states worked around: NC exempted, MN and WI allowed into registration permits, OH wrote permit by rule – but only for NG
 - some work arounds may depend on regional EPA acceptance in SIPs
- Secondary aluminum smelters?
 - intent of rule was to shut down really small operations so may not have good support behind reform

Renee will review old list, see if need more supporting info and put out request. Will need to take a draft list to NSC in November to get OK before sending out.

2. Plating and polishing

- Renee is compiling Q&A forwarded by other SBEAPs – so far all from Donna Lee (include source on list)
- some confusion out there with suppliers that major sources and operations affected by Chrome MACT not affected
- question on Chrome 3 applicability
 - even if less toxic, was included because that's how area source category was defined
 - Was it exempted in Chrome MACT? Seems like it was a P2 option...
 - **NOTE:** James reported back to Renee that Cr3 is affected under Chrome MACT

3. Chemical Manufacturing – proposal

- brochure Sharon sent out was for proposal, to help sources gauge content since unlikely to read through
- Linda read through the brochure and it looked good
- group should review if possible to see if any reason to submit comments

4. Halogenated Solvent reconsideration

- Sharon shared a link to the fact sheet which explains some of the reasoning for the reconsideration
- group should review and decide if anything we want/need to do in response (comment, outreach?)

5. Other issues:

- a. Renee - Does anyone know the source of a mandatory waterborne coating rule? I've been getting questions from suppliers and I can't figure out what I'm missing. There's nothing I've seen in CTG's or any word from our DNR.
- Joni – rule is from California, so if suppliers have connections in CA they may be asking about it in other states
- b. Sharon – new brochures coming out next week
- gasoline dispensing in Hindi and Urdu
 - dry cleaner in English and Korean
- c. Tony
- Autobody DVD – refining with comments about adding rule and SBEAP info; Holly going out to Vegas to show it off to those helping with development
 - Jeanette gave out Small Biz Awards to those working on Autobody DVD: Holly Wilson/CRC; Tony, Phyllis, Randy, Teresa, Kenya (others?) for work on DVD and training sessions connected to it
 - Heard about new SBO? Joan Rogers. Renee – thought it was mentioned at the last NSC call. Were waiting because she was on leave.
 - Trade Association meeting – not as many invited as in past years. Try next time to get the list and provide them with additional names/organizations.

Next Call: November 25th (Tuesday before Thanksgiving) – Let me know if you are not available. If enough will miss the call, we can switch it around.
