

**SBEAP Technical Subcommittee
Conference Call – November 25th
11:30 am Eastern**

Attendance: Aneka Swanson and Kim Grosenheider – MN; Leslie Churilla – GA; James Robinson – SC; Rick Carleski – OH; Tony Pendola – NC; Mandy Ellifritz – TX; Audrey – Enviroweb; Renee Bashel – WI; Sarah Walls – TX (NCAP rep)

Minutes:

1. Regulatory Review and Reform nominations for 2008/9
 - No comments from NSC, so letter will go out as-is next week.
2. Chemical Manufacturing – proposal
 - extension for comments until January 5, 2009 and promulgation due May 15, 2009
 - group should review if possible to see if any reason to submit comments
 - question on whether target HAPs listed – brochure references Table with 15 HAPs
3. Other Rule questions/issues?
 - Metal Fab applicability
 - seems to be conflicting messages between past information provided by rule writer, whether specific categories affected or generally any operations as listed – Renee will confirm
 - 6H – Tony has confirmed with Dupont that 13 coatings (yellows and oranges) still contain lead chromate
 - are alternatives, but don't perform as well; problems include poor coverage, where 6 coats might be needed to get same look as lead chromates (more expensive and higher VOCs)
 - one primer still contains chromates, but alternatives widely used/available
 - Sherwin Williams is only manufacturer that controls own sales, so will see if he can find out how much these lead chromate coatings are used vs alternatives
 - rumor of national conversion to waterborne coatings
 - appears to be coming from suppliers, with questions going to many states
 - connection with draft miscellaneous coatings CTG (july 08 - http://www.epa.gov/ttncaaa1/t1/ctg/20080703_misc_metal_plastic.pdf) or Canadian great lakes regs?
 - let Renee know if you get questions
4. Other issues:
 - start using Message Board created by Audrey – to share questions, discuss issues, etc. that might be short term (see her email on Nov 25th to subcommittee)
 - continue to use Technical Subcommittee page for permanent documents to share
 - other EPA updates from Sharon via email
 - review Dry Cleaner summary and comment ASAP
 - review translations for gas dispensing ASAP
 - Bin 6 proposals expected January for foundry categories and Feb – March for others (Paint and Allied Products, Chemical Prep, Asphalt Processing (not hotmix), Prepared Feeds)

Next Call: **Skip December** call unless really needed – would need to move from Dec 23rd scheduled time. Next call then **January 27th, 11:30 am eastern/10:30 central.**
