## WHAT ARE THE SMALL BUSINESS ASSISTANCE PROGRAMS?

Created by Congress under the Clean Air Act Amendments of 1990, the Small Business Assistance Programs operate in 50 states, 2 territories and the District of Columbia to assist small businesses in meeting their federal, state, and local environmental requirements.

Each Program is comprised of three components:

- ◆ A technical assistance component to provide the specific help that small businesses need
- ◆ An ombudsman function to advocate on behalf of small businesses within the regulatory environment
- ◆ A Compliance Advisory Panel made up of small business owners and representatives to consult and advise on program content

*Call your local Small Business Assistance Program for solutions to questions like:*

“Do I need a permit?”

“What are my record keeping and reporting obligations?”

“How can pollution prevention help me?”

“What is the proper control equipment for my process?”

“Is my business impacted by the Clean Air Act Amendments?”
